General Information

This document describes the Bridge eCQM v1.0.0 Real Word Testing Results for the year 2023. The 21st Century Cures Act Final rule mandates that health IT developers of certified health IT test the real-world use of Health IT for interoperability, as defined by the 2015 Edition Certification Criteria. The functionality and use cases included in this testing effort include all certification criteria under 45 C.F.R. §170.315 (c)(1-3) to which Bridge eCQM v1.0.0 is certified. This test results reports and evaluates the real-world usage of the certified criteria, while limiting provider and office workflow disruption.

Developer Name

- The Garage Solutions, LLC

Certified Product Name and Version

- Bridge eCQM v1.0.0

Certified Health IT Product List (CHPL) ID:

- 15.04.04.1520.Brid.05.01.0.231228

Changes to Original Plan

Summary of Change	Reason	Impact
No client data available for testing	There was no client roll out of the product for this testing cycle.	The impact of this reality lead to no reporting of results as per the planned test plan.

Summary of Testing Methods and Key Findings

There are no results to report according to the planned test plan.

Standards Updates(SVAP and USCDI)

Yes, I have products certified with voluntary SVAP or USCDI standards. (If yes, please complete the table below.)

No, none of my products include these voluntary standards.

<u>Standard (and version)</u>	<u>Updated certification criteria and associated product</u>	<u>CHPL Product Number</u>	<u>Conformance Measure</u>

Care Setting(s)

The care setting for which the product would be implemented is the ambulatory care setting.

Metrics and Outcomes

<u>Measurement /Metric</u>	<u>Associated Criterion(a)</u>	<u>Relied Upon Software (if applicable)</u>	<u>Outcomes</u>	<u>Challenges Encountered (if applicable)</u>
No results to report due to no usage.
