

A care manager's Al-enabled digital assistant that automates routine and repetitive tasks increasing outreach, productivity and driving exponential outcomes.

Benefits

Save Time: Average savings of 6-7 person-hours daily spent on patient outreach and follow-ups

Reduce Costs: Avoid potential admissions and re-admissions at an estimated annual cost savings of \$5M for every 1,000 high needs patients.

Boost Revenue: Increase annual revenue by an estimated \$300K for every 1,000 high needs patients.

Increase Quality Score and Compliance: Close care gaps in a timely manner and stay compliant with all state and federal requirements.

Features

- Available anytime, anywhere, with robust security and HIPAA compliance, ensuring precision in every task.
 - 24x7 execution. Receive comprehensive recaps of all activities within user-configured work shifts, keeping care team members fully informed and up to date on patient activity and outreach that occurred during their absence.
 - Streamlines outreach, follow-ups, documentation and patient touchpoints with automated scheduling and tracking.
- Monitors discharged patients, email and text activities, including invalidities and unsubscribes, and automates appointment reminders and scheduling.
- Comes bundled with ADT feeds from thousands of facilities with national coverage.
- Easily access comprehensive, longitudinal patient information, including cost of care, risk scores, diagnoses, and follow-up statuses, while ensuring timely reminders for non-responders.
- ✓ BlazeGPT for user-driven conversational experiences.
